

SANDY'S NO MATCH FOR WELDED STEEL TANKS

Hurricane Sandy was the largest hurricane ever measured on the Atlantic Ocean and caused an estimated \$65.6 billion of damage through winds and storm surge.

- **Durable**
- **Decades of documented performance**
- **Zero leak tolerance**
- **High-performance coatings**
 - » Offer new technology for greater maintenance cycles
 - » Ensure ANSI/NSF Std. 61 compliance
- **Multiple competitive bids on projects**
- **Sustainable community asset**
- **Lower cost of ownership**
 - » See total cost of ownership program at steeltank.com
