NSF 61/600 Ceramic Epoxy Tank Lining

General Information					
Description	100% solids NSF 61/600 potable water tank lining repair kit designed for touch ups, repairs, and small area jobs on concrete and carbon steel.				
	See <u>Perma-Clean 100</u> data sheet for large area applications				
Generic Type	Aliphatic Amine Epoxy				
	ST ASSUMES				
AWWA D102	ICS-5				
Available Colors	Blue and White, all cold	ors share a common part A	WATER QUALITY		
Available Kit Sizes	Α	300 mL cartridge			
	В	300 ml cartridge			
	Total Kit Volume	600 mL cartridge kit			
NSF 61/600	For use with tanks greater than or equal to 500,000 gallons, not exceeding a surface area to volume ratio of 4.6 cm <sup>2</sup> /L. Minimum Re-coat/Final Cure Time/temp prior to water immersion: 72 hours at 60 deg F, up to 150 mils DFT				
Performance Testing		ASTM D2794 Direct Impact	80 in·lbs		
		541 Adhesion to Ceramaprime primer	1900 psi @ 30 day primer cure		
		CE TM0174 Water Immersion at 120ºF	3 years no effect		
		ACE TM0174 Water Immersion at 75°F	3 years no effect		
	NACE INIO174 Water	Immersion in 1% sodium hypochlorite ASTM B117 Salt Fog	1 year, only color loss 10,000 hrs no effect		
Compatible Primers Surface Preparation	Ceramaprime, Ceramaprime LV, Ceramaprime CC, Indurazinc MC-67, PE-70, <i>direct to metal</i> All substrates clean and dry, free of dirts, oils, greases and contaminants				
	Carbon Steel	Abrasive blast to SSPC SP-10 with	a 1-3 mil profile		
	Concrete	Abrasive blast as per SSPC SP-13 to greater. Can be applied over Mortarch	an ICRI CSP 3 or		
	Repairs, small areas	SSPC SP-11 power tool to bare met			
Shelf Life & Storage		and B, Store long term between 35 and 9 n the 24 hours prior to application	90ºF, Recommend heating		

## Perma-Clean 100 Cartridge Repair Kit

## **Application Information**
